The application has been amended as follows: in line 2 of the abstract, "Power transmission means include:" was changed to "The power transmission includes:", so as to remove the term means in accordance with MPEP 608.01(b).

2. Claims 1-30 are allowed.

3. The following is an examiner's statement of reasons for allowance: the prior art neither anticipates nor makes obvious an electric power steering device comprising all elements as claimed, having a driven gear rotating in tandem with a nut of a ball screw mechanism, meshing and moving in tandem with a drive gear as claimed, and specifically wherein backlash for the drive gear or driven gear or backlash between the drive gear and driven gear can be adjusted in a continuous, non-stepped manner as set forth. The above recitation, combined with the rest of the structure in the independent claim, clearly defines over the art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
